PROFESSIONAL SUMMARY

- Highly motivated Full Stack Web Developer aiming to leverage expertise in Java, React.js, Node.js, and scalable solution development to contribute to innovative projects within a dynamic Computer Software Engineering environment. Prove ability in building responsive web applications, seeking to create impactful software solutions.
- Proficient in Java, React.js, Node.js, Express, MongoDB, and SQL, building responsive web applications and scalable software solutions.
- Demonstrated expertise in Data Structures and Algorithms, evidenced by a strong **GATE score** of **38.38**.
- Developed and deployed a travel booking website with 100% responsive design, improving site performance by 30%.
- Master of Computer Applications (**MCA**) graduate with a **CGPA** of **8.55**, showcasing a strong academic foundation.
- Completed the NeetCode 150 DSA list, enhancing problem-solving and coding skills.
- Solved over 200 coding problems on HackerRank & LeetCode, strengthening algorithmic expertise.
- Experience in creating and deploying applications using JavaFX, Java Swing with MySQL including single-player and multi-player games.
- Built multiple projects including a Shopping App with React and Redux, a Razorpay landing page clone using Tailwind CSS, and a Dev Detective app that fetches GitHub user data via API.
- Hands-on experience with cloud computing, Docker, Linux, and Git for efficient development and deployment workflows.

CAREER TIMELINE

Web Developer Intern
PK infoSoft

📅 Jun 2024 - Aug 2024

WORK EXPERIENCE

Web Developer Intern
PK infoSoft

📅 Jun 2024 - Aug 2024   📍 Delhi, India

- Contributed to the development and deployment of web applications, focusing on user experience and site responsiveness. Actively involved in coding, testing, and debugging to ensure website functionality and performance.
- Developed a fully responsive travel booking website, ensuring seamless user experience across various devices.
- Implemented front-end technologies including HTML, CSS, and JavaScript to enhance website interactivity and visual appeal.
- Collaborated with the design team to translate UI/UX designs into functional web components.
- Conducted thorough testing and debugging to ensure cross-browser compatibility and optimal performance.

Achievements:
- Improved site performance by 30% through code optimization and efficient resource management.

📅 2023

- Successfully deployed the travel booking website, contributing to its launch and initial user acquisition.

PROJECTS

Shopping App

🌐 **shivam-shopping-cart.netlify.app/**

📅 May 2025 - Jun 2025

- Developed a fully functional shopping cart application featuring dynamic product listings.
- Implemented add/remove cart functionalities using React and Redux for efficient state management.
- Ensured seamless data flow and consistent application behavior.
- Designed an Intuitive user interface to enhance the shopping experience.

Dev Detective

🌐 **shivam-dev-detective-app.netlify.app/**

📅 May 2025 - May 2025

- Developed the Dev Detective application to dynamically retrieve and present GitHub user information.
- Integrated GitHub API to fetch real-time user data.
- Implemented a dark mode feature with persistent user preference storage.
- Focused on creating a seamless and user-friendly data retrieval experience.

Weather App

🌐 **shivam-weather-page.netlify.app/**

📅 Apr 2025 - Apr 2025

- Engineered a weather application showcasing real-time weather data with dynamic visual icons.
- Utilized OpenWeather API to retrieve up-to-date weather Information.
- Designed a clean and responsive user interface with a mobile-first design strategy.
- Focused on providing accurate and visually engaging weather forecasts.

Razorpay Clone

🌐 **shivam-razorpay-cln.netlify.app/**

📅 Mar 2025 - Apr 2025

- Designed a responsive landing page clone of Razorpay.
- Utilized Tailwind CSS to implement a modern and visually appealing UI.
- Focused on pixel-perfect replication and responsive design principles.
- Enhanced styling skills and familiarity with Tailwind CSS framework.

Game Galaxy

🌐 **github.com/sagarpjpt/Game-Galaxy**

📅 Apr 2024 - Jun 2024

- Developed a Java-based desktop application featuring two single-player and two multiplayer games using JavaFX and Swing.
- Integrated MySQL database via JDBC to store and track user scores in real-time.
- Designed dynamic leaderboards and score-tracking systems to enhance user engagement and competition.

ACHIEVEMENTS

🏆 **Gate (2025) Score - 38.38:**
Demonstrates in-depth knowledge of core computer science subjects.

💗 **Solved over 250 coding problems:**
on HackerRank & LeetCode, improving algorithmic and problem solving skills.
